

MEETING THE PROJECT MANAGEMENT CHALLENGE

2004

Biography

Larry Leach

President, Advanced Projects Institute (API),

Larry Leach is the president of the Advanced Projects Institute (API), a management consulting firm. API specializes in leading the implementation of the new Critical Chain method of project management. Prior to that, he developed and operated Project Management Office for American National Insurance Company (ANICO), in Galveston. Larry worked at the Vice President level in several Fortune 500 companies. Larry has Masters' Degrees in both Business Management from the University of Idaho, and in Mechanical Engineering from the University of Connecticut. He was awarded membership in Tau Beta Pi, the Engineering honorary society, while earning his undergraduate degree in Engineering at Stevens Institute of Technology. Larry is a member of the Project Management Institute and the American Society for Quality Control. His has published many papers on related topics, including a PMI Journal article on Critical Chain in June, 1999, and a pair of papers published in PM Network in spring, 2001. He presents seminars for PMI Seminars, and authored the recently published book, Critical Chain Project Management.
